

Split Plot ANOVA Report

=====

Between factor: studytime
Within factor: Time
Repeated measures: G1, G2, G3
Subjects: 649

Between p-value: 1.26414e-10
Within p-value: 4.44089e-16
Interaction p-value: 0.110293

The between effect uses Subjects within between-factor groups as its error term.
The within and interaction effects use the within-subject residual error term.
