

# Split Plot ANOVA Report

Between factor: studytime  
Within factor: Time  
Repeated measures: G1, G2, G3  
Subjects: 649

Between p-value: 1.26414e-10  
Within p-value: 4.44089e-16  
Interaction p-value: 0.110293

The between effect uses Subjects within between-factor groups as its error term.  
The within and interaction effects use the within-subject residual error term.
