

KPSS Test

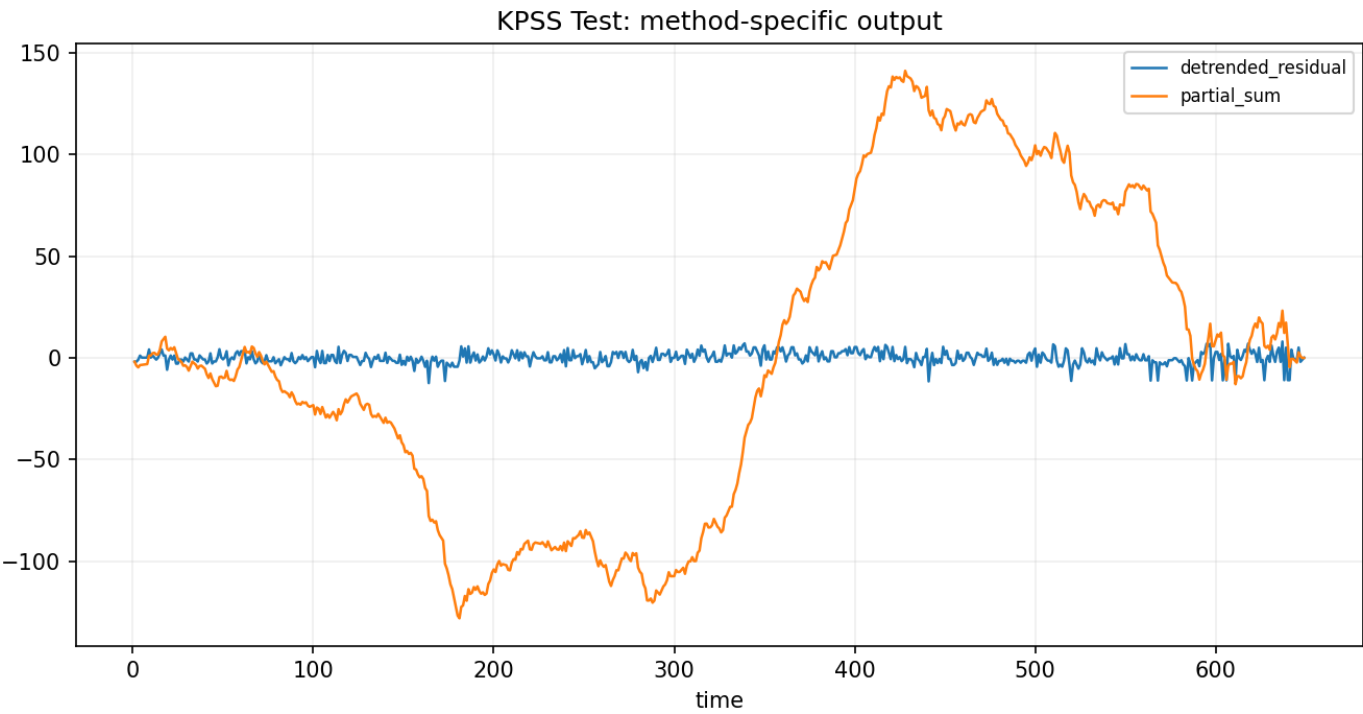

hypothesis_test | source-row order | page 1

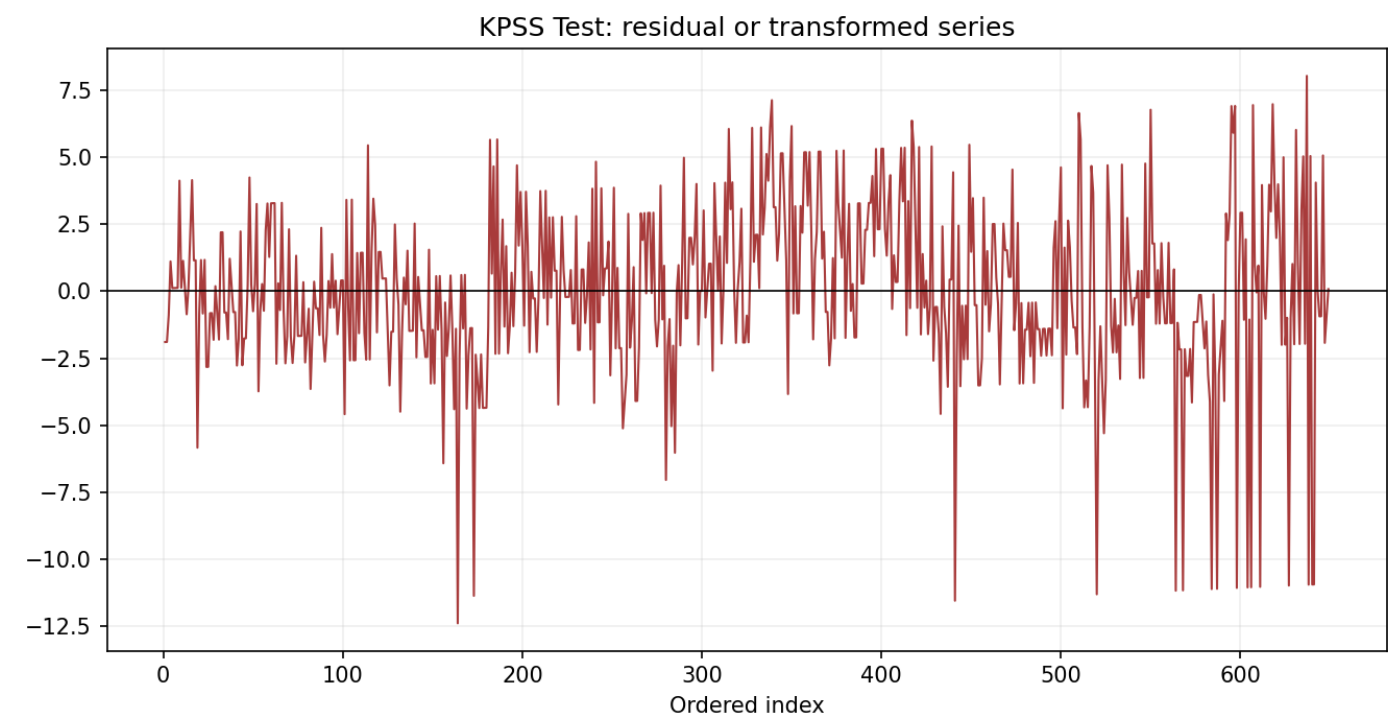

Method type: hypothesis_test
Design: KPSS trend-stationarity test for G3 with automatic Newey-West bandwidth.
Formula: $KPSS = \frac{\sum (S_t^2)}{(n^2 \cdot \sigma_{HAC}^2)}$
Variables: G3
Series order: source-row order
kpss_statistic = 0.33339135059886155
p_value = 0.01
hac_lags = 12
