

MA Model

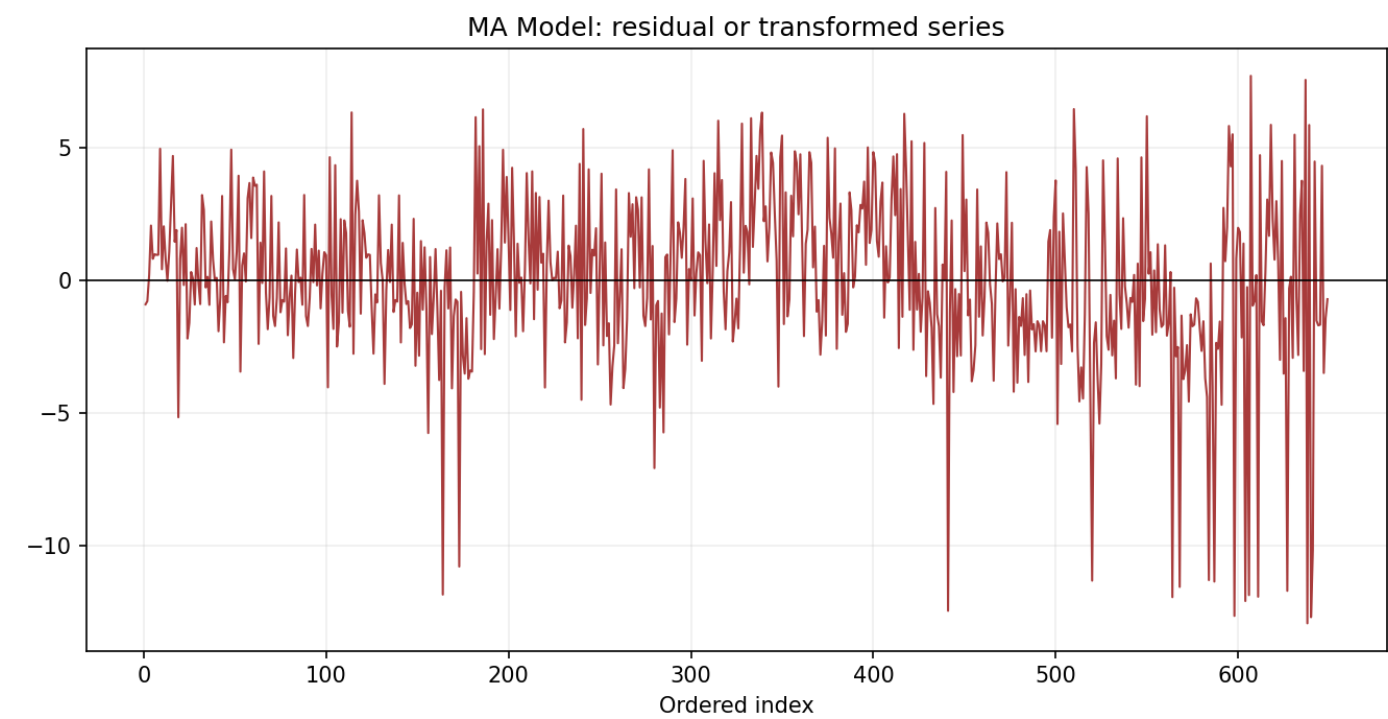

Method type: moving_average_error_model
Design: MA(1) stochastic error model fitted to the level G3 series.
Formula: $y_t = c + e_t + \theta_1 e_{t-1}$
Variables: G3
Series order: source-row order
ma_order = 1
ma_1 = 0.13633251602971483
innovation_variance = 10.154904569624575
