

Survival Analysis

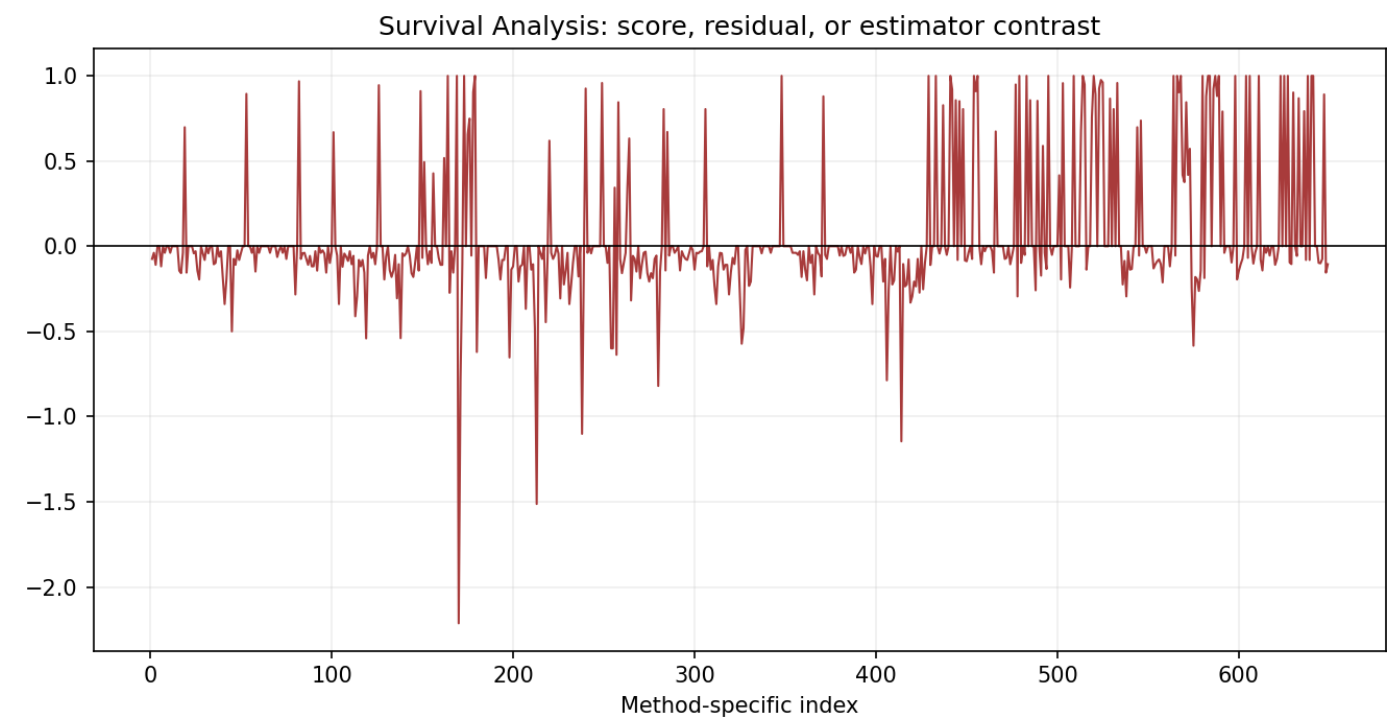

Method type: integrated_survival_workflow
Design: Integrated workflow combining overall Kaplan-Meier survival, Nelson-Aalen hazard, sex log-rank co
Formula: KM + NA + log-rank + Cox PH, each retaining its own estimand
Variables: absences, G3, sex, age, studytime, failures
records = 649
events = 100
censored = 549
log_rank_chi_square = 2.9401130594212206
