

Tarone Ware Test

weighted_two_sample_test | right-censored demonstration | page 1

Method type: weighted_two_sample_test

Design: Tarone-Ware comparison of failure-time distributions by sex with square-root risk-set weights.

Formula: $w(t)=\sqrt{Y(t)}$; $Q=U^2/V$

Variables: absences, G3, sex

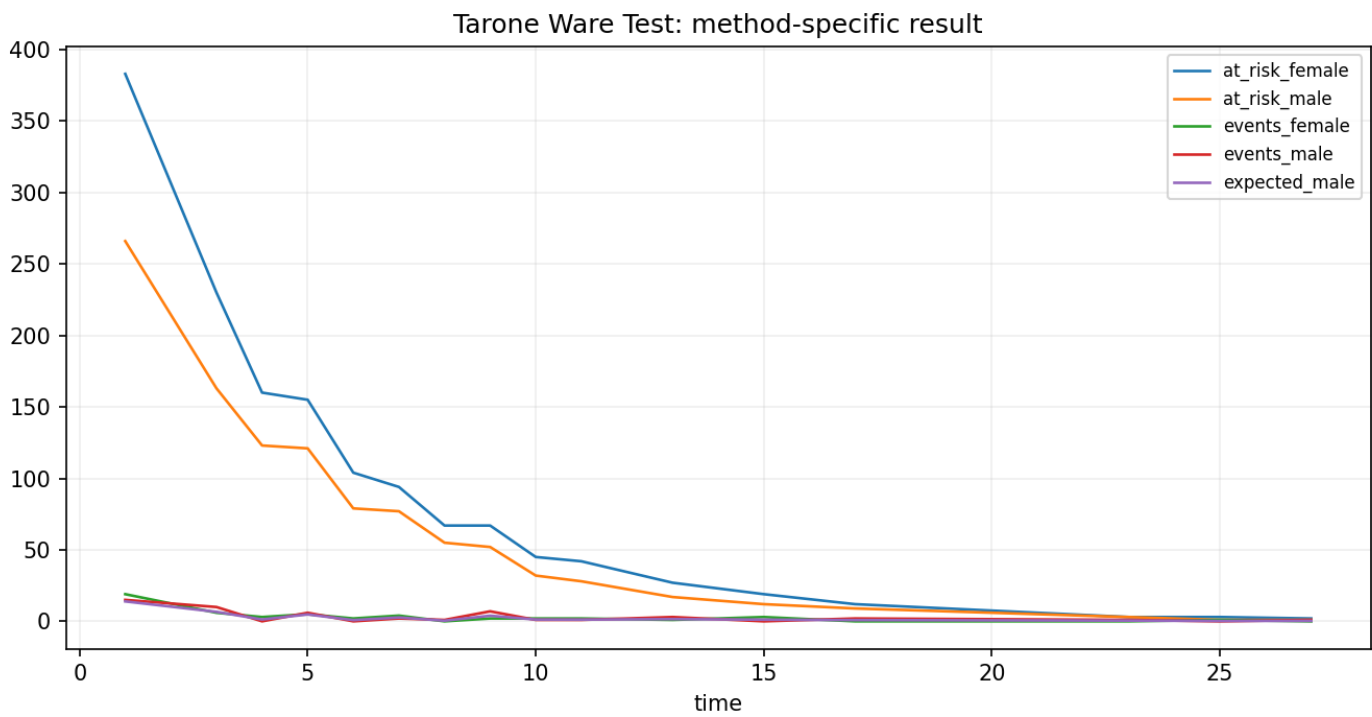

tarone_ware_chi_square = 1.6474268505749001

df = 1

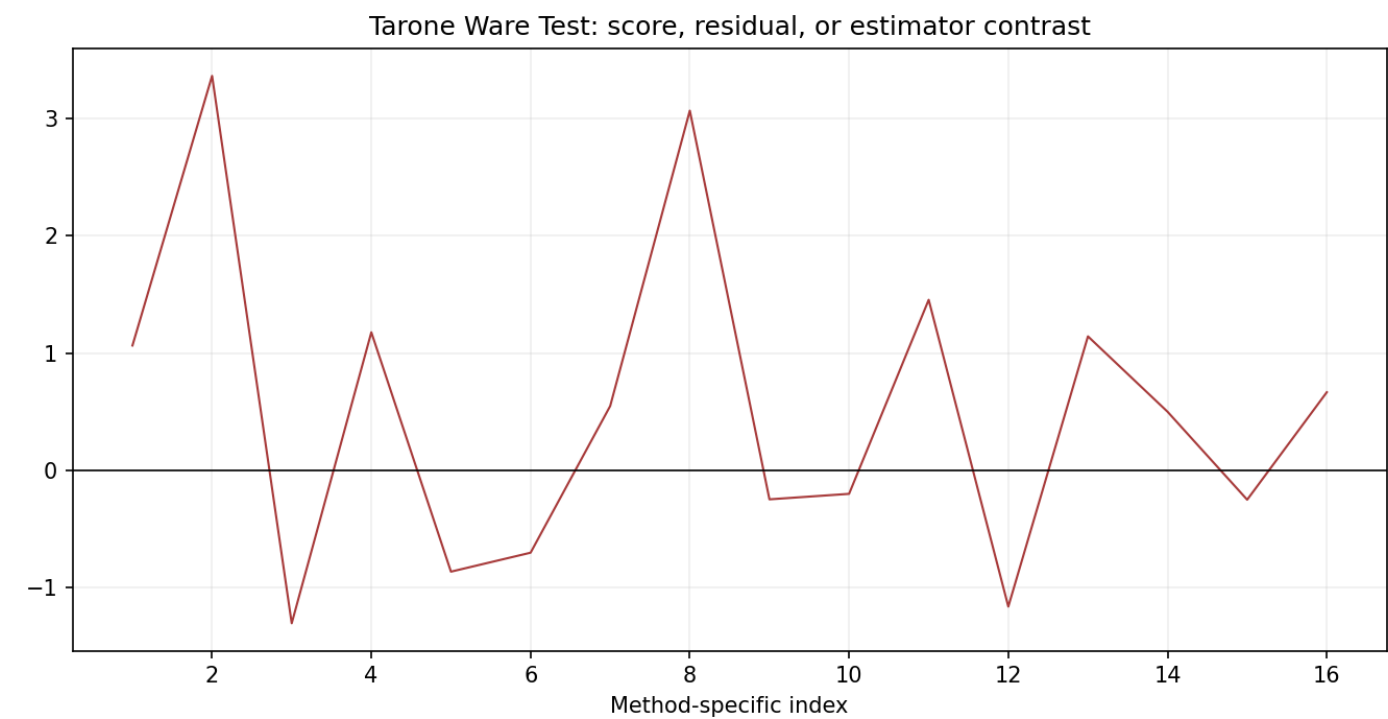

p_value = 0.19930951260733673

weighted_score = 116.56786974925237
