

Time Series Analysis

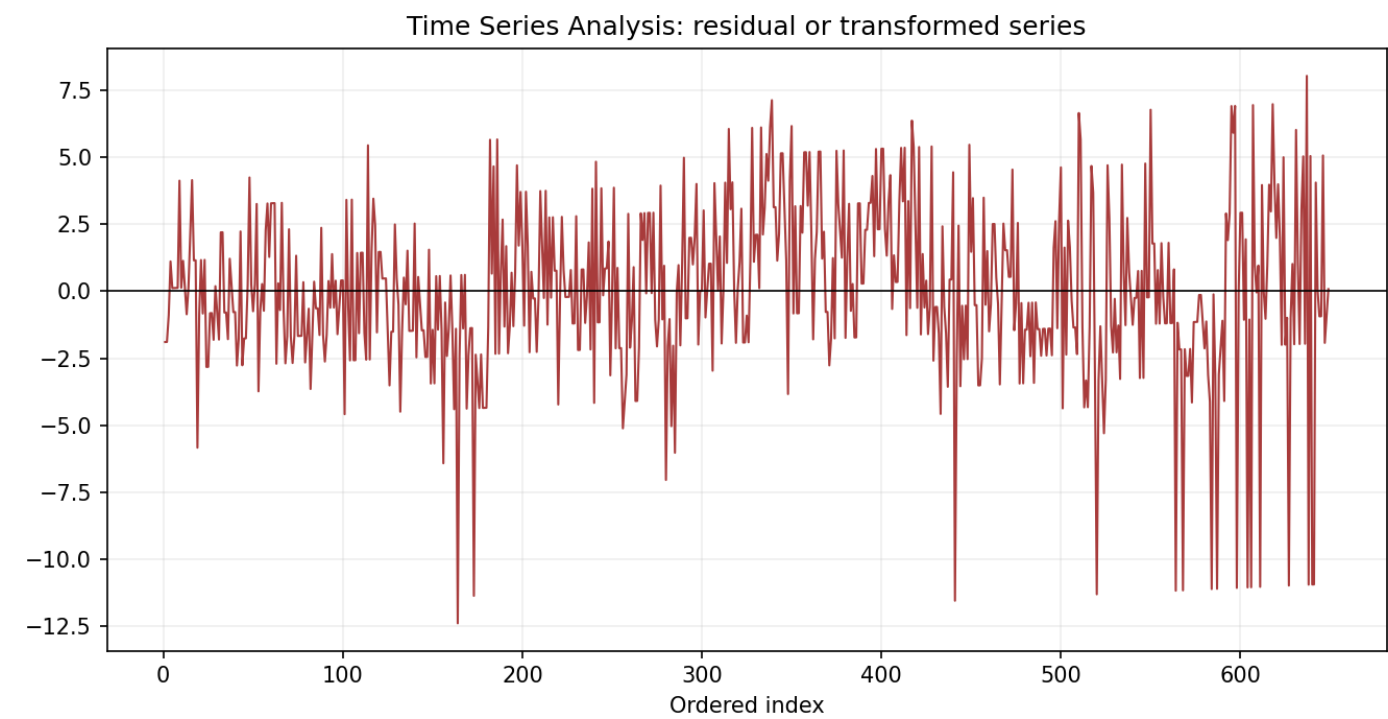

Method type: descriptive_time_series_workflow
Design: Integrated descriptive workflow for ordered G3: level, change, trend, and serial dependence.
Formula: y_t summarized by trend OLS, first differences, and ACF(1..12)
Variables: G3
Series order: source-row order
n_series = 649
mean_level = 11.906009244992296
sd_level = 3.230656242804805
