

Time Series in Excel

software_workflow | source-row order | page 1

Method type: software_workflow

Design: Excel-reproducible linear trend plus three-point trailing average for ordered G3.

Formula: TREND uses OLS; moving mean_t=AVERAGE(y_(t-2):y_t)

Variables: G3

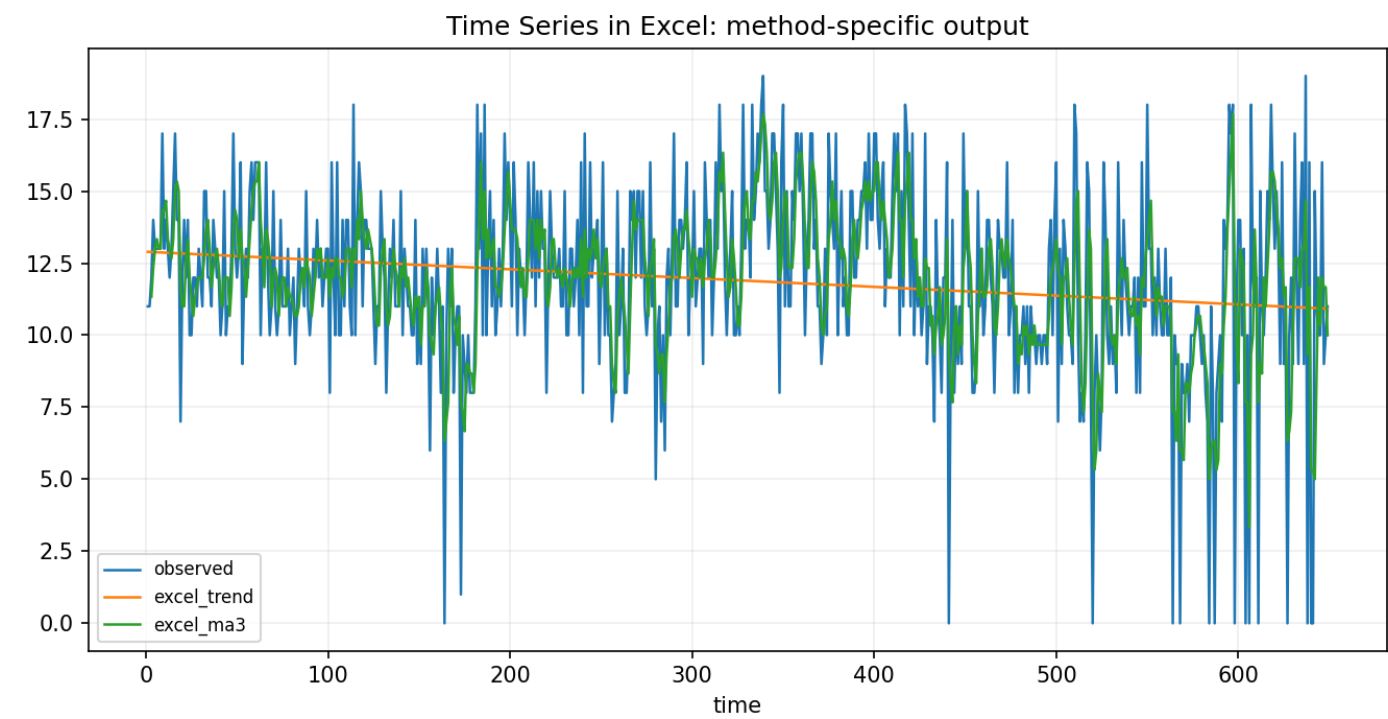

Series order: source-row order

rows = 649

trend_intercept = 12.896321976830471

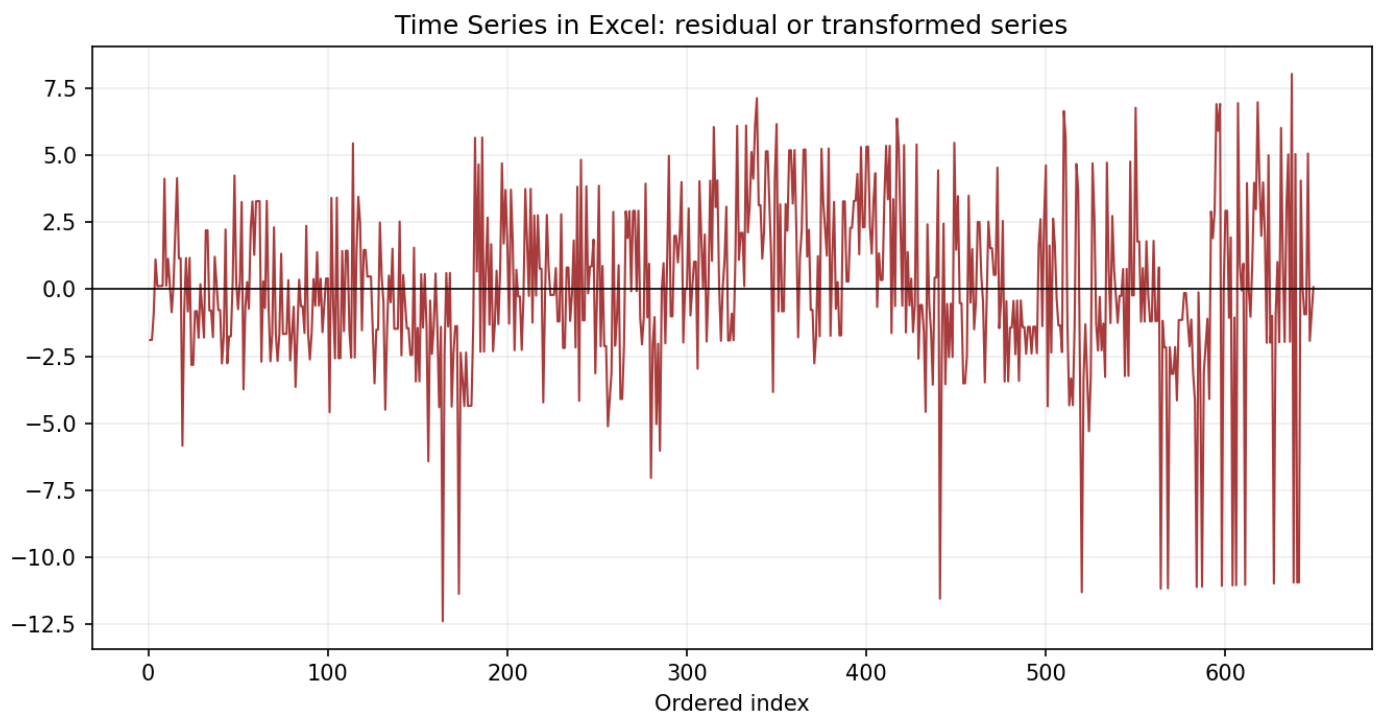

trend_slope = -0.0030471160979635326
