

Trend Analysis

trend_analysis | source-row order | page 1

Method type: trend_analysis

Design: Linear time trend for G3 with HC3 robust standard errors.

Formula: $y_t = \beta_0 + \beta_1 t + e_t$

Variables: G3

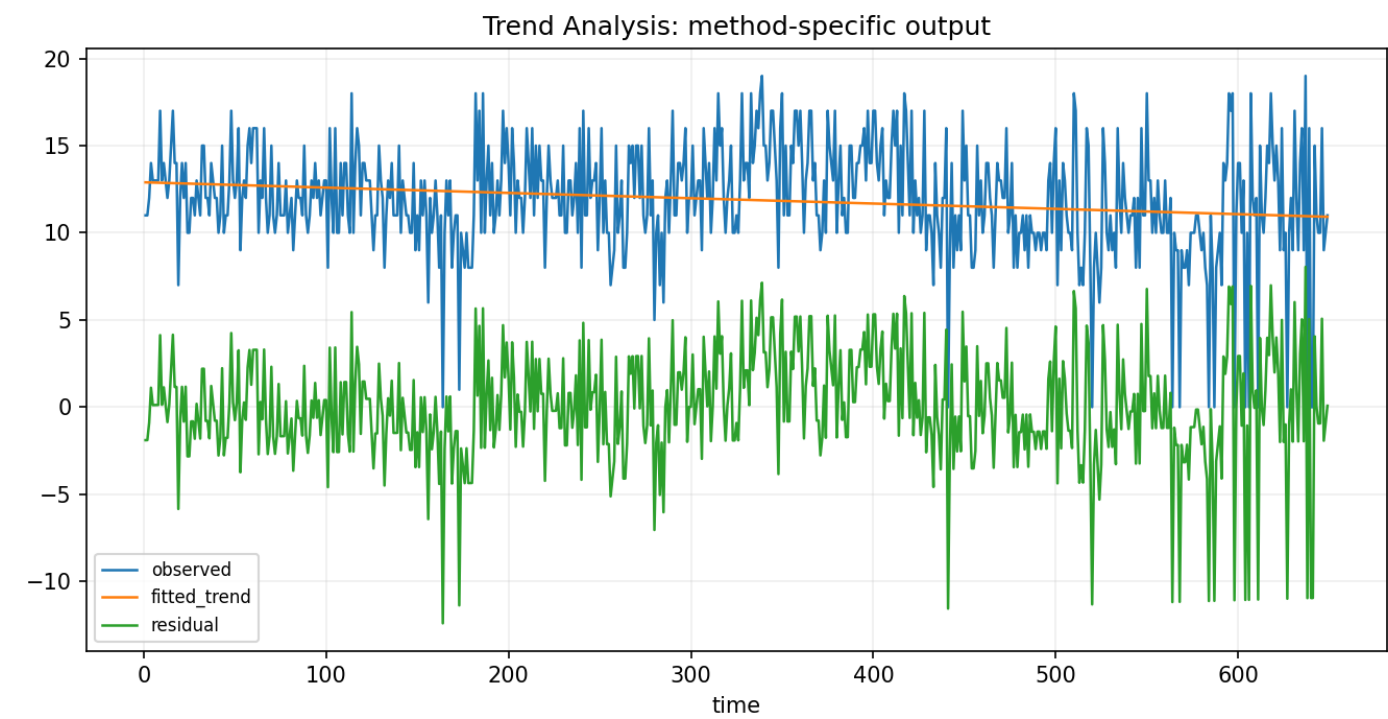

Series order: source-row order

intercept = 12.896321976830471

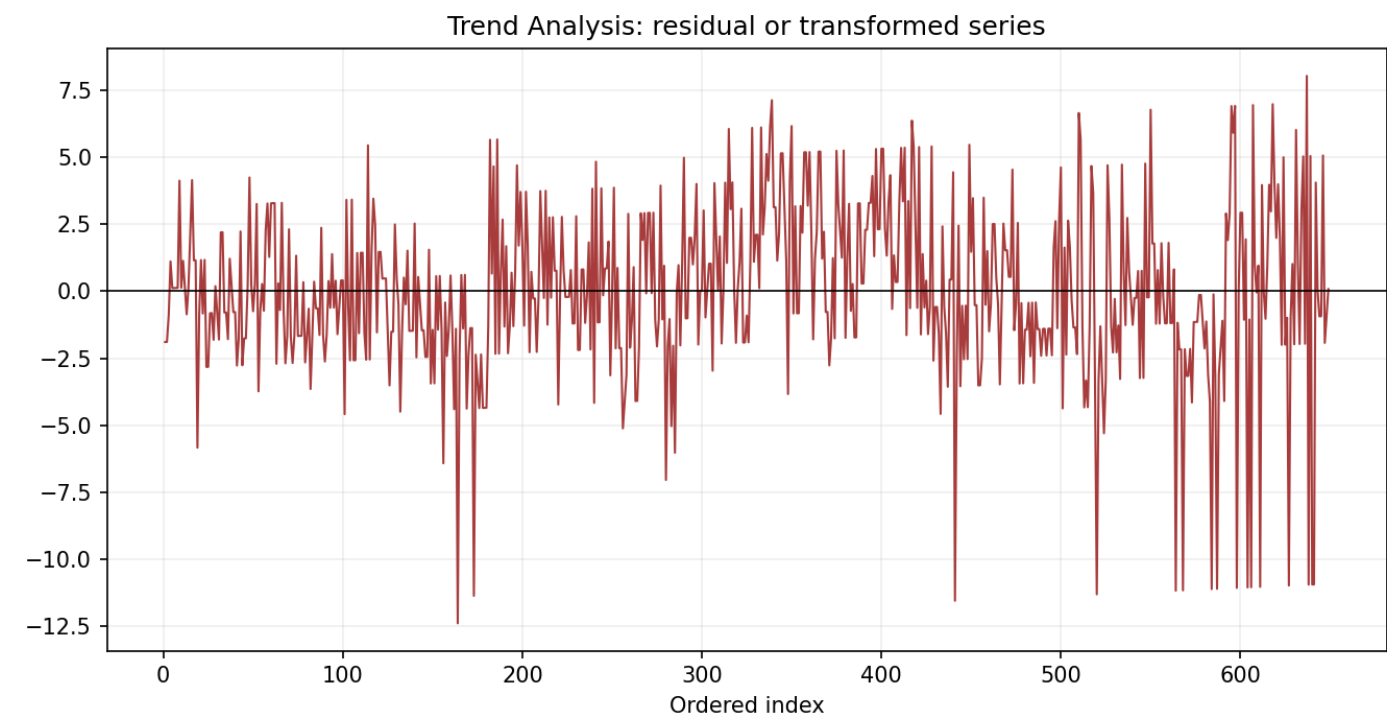

trend_slope = -0.0030471160979635326

robust_se_slope = 0.0007290710490518141
